

### **HEUSSEN strengthens its real estate and construction law practice in Frankfurt with Angelika Schwabe**

Frankfurt, 09.12.2021 - HEUSSEN Rechtsanwaltsgesellschaft mbH has strengthened its Frankfurt office with Angelika Schwabe as a partner in real estate and construction law as of 1 December. Angelika Schwabe previously worked for many years as a lawyer and partner at BUSE in Frankfurt. Her practice focuses on private and public real estate and construction law with an interface to public procurement law. She thus complements HEUSSEN's advisory services in an excellent way.

Stephan Correll, Head of HEUSSEN's Frankfurt office, explains: "In the course of her career, Angelika Schwabe has gained in-depth knowledge and experience in the fields of real estate and construction law as well as the adjacent interfaces, in particular with public procurement law, in public administration, in companies as well as in banks. Our claim is to offer our clients full service and so we are pleased to follow this claim with Angelika Schwabe and to expand the team in real estate and construction law." Angelika Schwabe adds: "HEUSSEN's strong position in the SME sector as well as with investors, property developers and project developers fits very well with my client base. There is great potential and so I am looking forward to contributing my advisory experience and helping to advance the practice in Frankfurt."

Real estate and construction law is one of the main pillars of HEUSSEN's practice. More than 30 specialised lawyers provide comprehensive advice in real estate and construction law at all offices. In addition to assisting with real estate transactions, the spectrum ranges from project development (including assistance in obtaining building rights) to planning and construction assistance to advice on portfolio management and marketing (sales and leasing). Our clients include national and international real estate companies, real estate companies of banks and insurance companies, large and medium-sized companies in the construction industry, real estate owners, investors, investment companies, plant constructors, project developers, project controllers, architects, engineers, brokers, property developers and construction supervisors.
