

HEUSSEN: Partner Dr Jan Dittmann among the top real estate lawyers in WiWo

Munich, 21 January 2021: In the current survey by WirtschaftsWoche on the list of the "most renowned law firms and lawyers for real estate law", Dr Jan Dittmann was again recommended particularly frequently by the experts surveyed this year. He and the practice group are thus among the top addresses for real estate law in Germany.

In addition to providing legal advice on real estate transactions and real estate project developments, Dr. Jan Dittmann's main areas of expertise include advising on all construction law matters and litigation in court. The main focus in connection with real estate project developments is on city districts and hotels. Another focus is advising wealthy individuals (private clients) and family offices on real estate transactions and funds.

Meanwhile, the real estate and construction law practice group has continued to expand at various locations, with partner Angelika Schwabe in Frankfurt (also interface with public procurement law) and partner Torsten Prokoph in Stuttgart. The interfaces to the corporate and investment funds practice were also strengthened with partner Nicole Alexander-Huhle and partner Clemens Richter (both Munich), and the interface to compliance with partner Dr Franz-Clemens Leisch, also based in Munich.

For the best list, the Handelsblatt Research Institute (HRI) asked 2,100 lawyers from 175 law firms about their most renowned colleagues in real estate and construction law. A jury of experts then filtered out 23 law firms with 32 lawyers from the entries for private construction law and 23 law firms with 35 lawyers for real estate law.
